

Climate Finance Training (CliFiT)

About the training

The Climate Finance Training (CliFiT) is a **dynamic, interactive training package** with a focus on successfully developing, financing and implementing climate projects. The training covers a wide range of funding sources and mechanisms, with a specific focus on the Green Climate Fund (GCF).

Target group

The training includes a range of modules covering key areas of climate finance access. The training primarily targets **developers and implementers of climate change projects**, including:

- Staff from ministries of environment, finance, planning, and other relevant bodies;
- National climate finance Focal Points;
- GCF accreditation applicants;
- Climate finance institutions, think tanks, donors, NGOs involved in climate finance.

Modular training toolkit

The training package follows a modular concept, offering several combinations for different learning paths and addressing the specific training needs of the target group.

The **modules of CliFiT** currently include:

- Introduction to climate change basics, the climate finance landscape, climate policy, and the main funds;
- Sector-focused modules on GCF project development in agriculture, water and transport (CliFiT4SE);
- Accessing and Managing Climate Adaptation Finance;
- Private Sector Engagement in Climate Projects;
- Green Public Financial Management;
- + **Trainer manual** with guidance on how to conduct CliFiT virtually and face-to-face.

All modules are available in **English, French and Spanish**.
